PROFESSIONAL SUMMARY

Backend Software Engineer with **4.2 years** of experience specializing in building scalable systems using **Node.js, TypeScript, GraphQL, and PostgreSQL**. Demonstrated expertise in REST APIs, event-driven architecture, and Salesforce CPQ integrations, with a strong focus on cloud infrastructure using **AWS and Azure**. Proven track record in optimizing performance, implementing automation, integrating AI, and ensuring system reliability across Web3, ERP, and CPQ domains.

EXPERIENCE

Sigma Solve, Inc.

Jan 2025 – Mar 2026

Software Engineer – Backend (Node.js, TypeScript, Next.js API Routes, PostgreSQL, Azure)

Pune, Remote

- Built scalable backend services using **Node.js, TypeScript, and Next.js API Routes**, integrating Salesforce CPQ for complex multi-tier pricing workflows and automated quote generation at scale.
- Designed high-performance **REST APIs** for bulk Excel/CSV data processing, improving pricing efficiency by **30%+** engineered secure file pipelines via **Azure Blob Storage** with signed URLs.
- Automated workflows using **pg_cron** and webhooks, reducing manual backend operations by **40%**; implemented **event-driven architecture** for real-time Salesforce CRM ↔ Supabase/PostgreSQL sync.

Biz Technologies IT Solutions

Mar 2023 – Dec 2024

Node.js Backend Developer (Node.js, Express.js, MongoDB, Web3, IPFS, AWS, React)

Mumbai

- Architected full backend for a **Web3 marketplace** supporting NFT trading, virtual land ownership, and digital asset transactions with smart contract integration on the blockchain.
- Developed decentralized **REST APIs** for scalable asset discovery, transaction processing, and ownership verification, inspired by patterns from large-scale virtual ecosystems like Decentraland.
- Integrated **IPFS with MongoDB** for a hybrid storage layer – IPFS for immutable asset data, MongoDB for structured metadata – and optimized queries to reduce API response time by **10–15%**.
- Led end-to-end backend ownership of asset lifecycle including minting, transfers, rental logic, and marketplace transactions with full blockchain and database consistency.

Red Roots India Pvt. Ltd

Apr 2022 – Mar 2023

Node.js Backend Developer (Node.js, Express.js, PostgreSQL, GraphQL)

Mumbai

- Built and maintained scalable **ERP backend systems** using Node.js and PostgreSQL covering HR, sales, inventory, and vendor operations for a mid-sized enterprise client.
- Developed an automated **expense management module** with multi-level approval workflows, reducing HR processing workload by **20%** and improving finance team visibility.
- Improved overall **API performance by 20%** through targeted query optimization, strategic indexing, and response caching, resulting in faster page loads and better UX.
- Implemented **role-based access control (RBAC)** and secure JWT-based authentication, ensuring fine-grained authorization across all ERP modules and protecting sensitive employee data.

KEY PROJECTS

Wildeck.com – CPQ Sync System

Node.js, Next.js API Router, TypeScript, PostgreSQL, Supabase, Azure

- Engineered a **12-step Quote Sync Engine** integrating Salesforce CPQ with Supabase, handling complex pricing rules, quote versioning, and multi-system data reconciliation in real time; automated email notifications via **Resend API** for quote lifecycle events and send the product price.
- Built **webhook-based event architecture** for automated sync and **bulk Excel/CSV import pipelines** with field validation, mapping, and error handling to support large-scale pricing data operations.

Decentrwood – Web3 Marketplace & Game

Node.js, Express.js, MongoDB, Web3, IPFS, React, Unity

- Developed full backend for a **decentralized NFT marketplace** supporting buying, selling, and renting of virtual lands and digital assets with on-chain transaction integrity and ownership transfer.
- Built **game backend services** for scoring, reward distribution, and real-time inventory management supporting concurrent multi-user gameplay across a fully decentralized architecture.

TECHNICAL SKILLS

- **Languages & Runtime:** JavaScript (ES6+), TypeScript, Node.js, Next.js (API Routes)
- **Backend Frameworks & APIs:** Express.js, NestJS, GraphQL (Apollo Server), REST API Design, Webhooks, GraphQL API
- **Databases:** MongoDB(Mongoose Odm), PostgreSQL Supabase, Redis (caching), Query Optimization, Indexing
- **Cloud & DevOps:** AWS (EC2, IAM), Azure Blob Storage, Docker, Git, GitHub, Jest, Mocha
- **Architecture & Concepts:** Event-Driven Architecture, System Design, RBAC, Salesforce CPQ, Web3/IPFS, pg_cron, JWT Authentication, API Security

EDUCATION

B.Tech in Computer Science Engineering

2016 – 2020

Seth Vishambhar Nath Institute of Engineering & Technology, Uttar Pradesh, India

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering
